

## FOUNDING

warp it AG was founded in 2000 as consulting company for AEROSPACE & DEFENCE.

As B2B and A2A-specialists we offer a comprehensive consultation in all project phases to our customers. From the analysis and concept production up to the realization and briefing / training we cover the whole spectrum.

We would like to support your company during planning, installation and introduction in logistic solutions. We gladly provide information within the range of SPEC2000 (ATA/ASD) to you and would like to support you in customized problems as well. We integrate the specifications into your existing IT landscapes. For this purpose we engaged several specialists with the experience of several years from ranges of ATA SPEC2000 and ASD SPEC2000M.

## EXPERIENCE / KNOWLEDGE

All our founding members and employees have expert knowledge from many years of experience in logistic processes in the military area and in civil aircraft production. In the more and more growing world of electronic communication we keep our knowledge constantly up to date in order to be able to suggest to you the best and most current solution types.

- Ø Logistic Processes
- Ø Electronic data interchange and electronic processes
- Ø Specifications (C-1-4, B007, SPEC2000/SPEC2000M,LSA)
- Ø Database Knowledge
- Ø Several Dev-languages

## FIELD OF ACTIVITIES

Consulting:

- Ø SAP Consulting/development  
One of our basis activities is the SAP R/3 consulting. In this area there are several projects with customers, who want to implement SPEC2000 communication with their partners. We offer them our help to install the communication modules, to adapt and enhance the SAP modules MATERIAL MANGEMENT (MM) and SALES AND DISTRIBUTION (SD). The SPEC2000 modules will be integrated in their R/3 solution in the best way. To customize modifications and customer specific development in the R/3 programming language is our specialty.
- Ø SAP XI/PI development  
Software components (SWC) and Scenarios for ATA SPEC2000 and ASD S2000M design, development and installation of A2A and B2B scenarios  
development of mappings, Java modules for mapping and adapters  
Adapter development
- Ø Analyse of Logistic Business Processes
- Ø Project management
- Ø Software Development/Customizing
- Ø Database setup/installation/development
